MEMORANDUM FOR: Director, National Foreign Assessment Center  
FROM: Director of Central Intelligence

In connection with the SCC meeting on November 15th for petroleum supply vulnerability, I would like to know what contribution we have to make to this, including a specific outline of introductory remarks that I or you would make. I don't think we should answer the basic question of what is our vulnerability, but give some kind of an intelligence assessment of what we know and what our intelligence capabilities would permit us to know.
